

## Nature is unpredictable. Natural perils pricing doesn't have to be.

Navigating natural perils insurance can be difficult. At Finity, we are experts in Australian natural perils risks. Our market leading natural perils product Finperils, built specifically for pricing, provide deep insights into the financial impacts of catastrophic events, including storm, flood, bushfire, coastal erosion and cyclone risks.

# Benefits

Make better informed strategic pricing decisions on perils pricing at an address level

Have confidence that you are charging the right price for the right risk

Builds trust with underwriters through greater transparency and better knowledge of risk at an address location

Easily implementable in insurance pricing algorithms and rating engines

# How it works

Underpinned by leading-edge modelling techniques, climate expertise and strong pricing knowledge in the insurance industry, Finperils gives you access to the latest, high quality perils pricing information you need to make accurate and more informed strategic pricing decisions.

storm

bushfire

flood

cyclone

coastal

## How businesses are using Finperils

A large personal lines insurer integrated the Finperils models in their rating algorithm at a granular address level by different perils risk. By doing so, they were able to target better premium pricing at each location, improving their underwriting capabilities, reducing their volatility of exposure to natural perils risk, which improved their profitability.

### About Finity

*Finity's unrivalled depth of actuarial and strategic expertise has inspired a range of cutting-edge products focused on practical commercially aware solutions that add value to your business.*
