

## Makes insuring property easy

Rebuild is a building sum insured calculator that provides quick and accurate residential rebuild cost estimates – taking the guesswork out of insuring property.

# Benefits

Fast and simple process, significantly improving the customer journey

Cost effective and easy to use

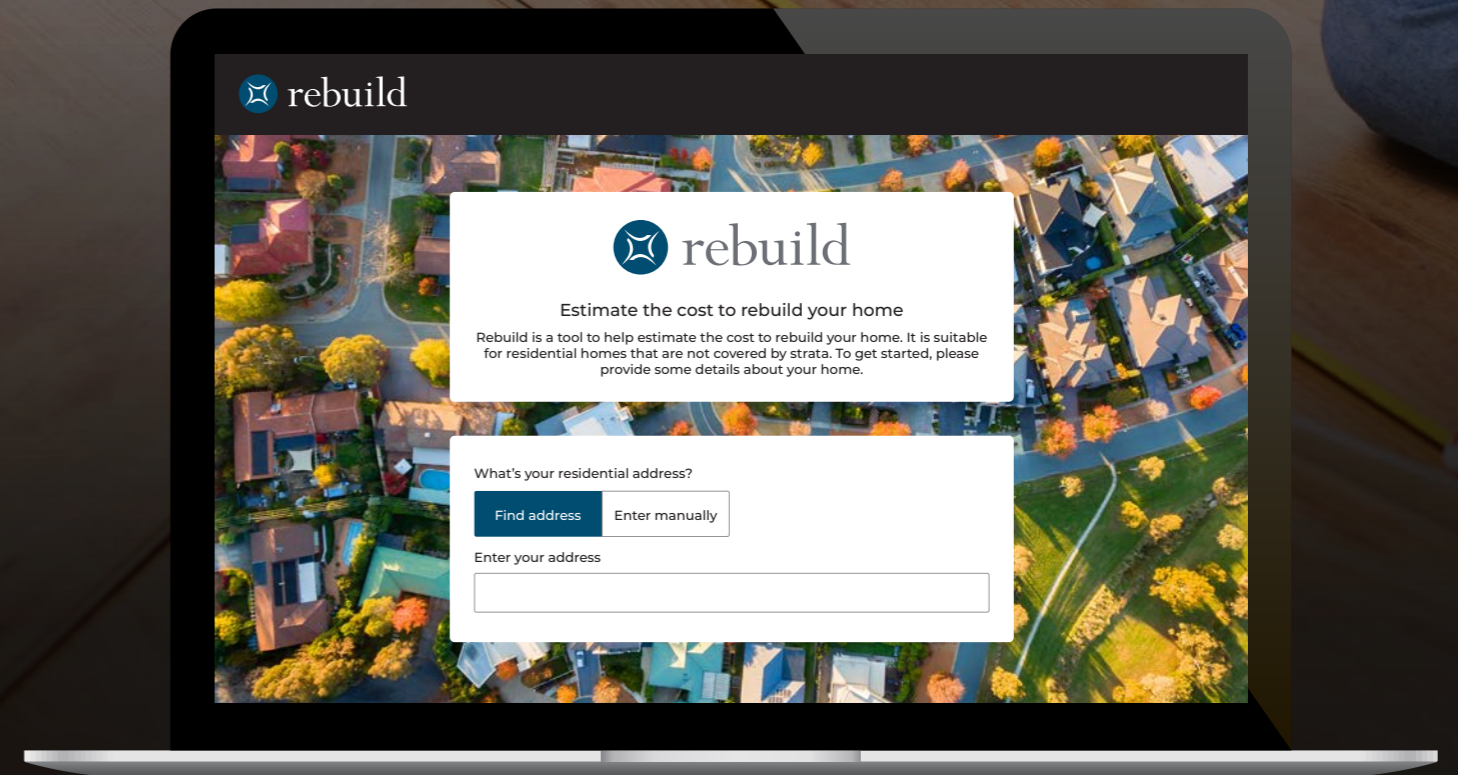

Seamlessly integrates with insurance systems

Customisable and flexible solution, with a range of use cases

# How it works

Rather than the customer entering details for a large number of property attributes, Rebuild has a streamlined question set enhanced by pre-populated property data. As an API it can also be easily integrated with an existing online quote process – offering an enhanced customer experience.

## How Rebuild is helping businesses

**Improving the customer experience:** Rebuild offers a quicker, more streamlined customer journey for new and existing customers.

**Understanding your portfolio:** Rebuild offers a portfolio-wide analysis of underinsurance.
